

Sterilizable Scene Graph Generation for Operating Rooms

Nick Lemke, Ssharvien Kumar Sivakumar, Antoine P. Sanner, John Kalkhof, Henry John Krumb, Ghazal Ghazaei, Anirban Mukhopadhyay

Baselines

3 - 68 Million Parameters

Requires a workstation

SG-NCA

Lighweight scene graph generation with 40k Params

Runs on minimal hardware such as a Raspberry Pi

Operating rooms need methods that run on minimal hardware.

SG-NCA is deployed on easily sanitizable hardware.

Class-incremental schedule trains SG-NCA on multi-class scenario. Lightweight relation classifier predicts pairwise interactions.

Achieves Pareto improvement.

SG-NCA generates scene graphs.
